Projects

VistaVR
Capstone Project

- Developed a mobile-based VR eye testing application using Unity and C#, integrated with a VR box to conduct digital vision assessments. The system includes visual acuity, color blindness, and astigmatism tests, enhanced with voice recognition for hands-free user interaction. It is designed to efficiently record, and print test results, providing a portable and user-friendly solution for preliminary eye screening. This project demonstrates skills in VR development, mobile application design, and interactive healthcare systems.
