WENCE BENIEREM S. TONGOL

Full-Stack Developer

Minalin, Pampanga | 0930 751 9702 | tongolwey@gmail.com | wencetongol.vercel.app

PROFESSIONAL SUMMARY

Full-stack developer working mainly in TypeScript. Builds Next.js and React interfaces, the APIs that serve them, and the PostgreSQL databases behind both, as well as the integrations that connect applications to AI tools. Tests while building and documents as work progresses, so it can be handed over cleanly.

Currently delivering business automation as a CRM Developer Associate: Zoho CRM workflows that turn records into finished client documents, Model Context Protocol connectors that automate daily work, and integrations that recover on their own when a connection drops. Mostly REST and OAuth 2.0 underneath, verified with Postman and PowerShell before release.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Node.js, Python, Zoho Deluge, HTML, CSS, SQL

Frontend: ReactJS, Next.js, Tailwind CSS

Cloud and Identity: Microsoft Azure, Microsoft Entra ID, OAuth 2.0, JSON Web Tokens (JWT)

Platforms and APIs: Zoho, Microsoft Graph, Microsoft Purview eDiscovery, Model Context Protocol, REST APIs, Webhooks, Vercel

Databases: MySQL, PostgreSQL, Supabase, Neon

Testing and Tooling: Postman, PowerShell, Docker, Git, GitHub, Vitest

AI Tooling: Claude, Codex — development workflow, code assistance, documentation, and integration debugging

PROFESSIONAL EXPERIENCE

CRM Developer Associate

Manentia Enterprise Support PH Inc. | June 2026 – Present

- Automate Zoho CRM processes using Deluge scripting and Zoho Writer templates that generate client reports and investment proposals.
- Deliver custom MCP connectors on Azure App Service, exposing enterprise systems to AI assistants under per-user identity and audit control.
- Integrate Microsoft Graph email search and Microsoft Purview eDiscovery through app-only OAuth 2.0, applying least-privilege scopes and audit logging.
- Engineer a FIX 4.4 order-routing service in Python against a private bank's Rules of Engagement, covering mutual-TLS transport, session recovery, engine evaluation (QuickFIX/J against quickfix), and an end-to-end simulator test suite.
- Verify REST integrations with Postman, PowerShell, and EcoHub, exercising token handling, payload structure, and failure paths.
- Resolve assigned IT helpdesk tickets alongside development work.

Projects

JB FIX System — Private-Bank Order-Routing Connector (FIX 4.4)

Python, FIX 4.4 (QuickFIX/J & quickfix), Mutual TLS, SQLite, pytest | 2026

- Built a FIX 4.4 order-routing service linking an asset manager to a private bank through the Broadridge/NYFIX hub, with pre-trade validation and a persist-before-send pipeline.
- Added auto-reconnect, sequence gap-fill recovery, mutual-TLS transport, and a SHA-256 hash-chained audit trail, proven end to end against a bank simulator with 58 automated tests.

Enterprise MCP Connectors — Identity-Aware Integrations on Azure

Node.js, Microsoft Azure, Microsoft Graph, Microsoft Entra ID, OAuth 2.0, Azure Key Vault, GitHub Actions | 2026

- MWC Mail Search — read-only email search across Exchange Online via Microsoft Graph, secured with Entra ID OAuth 2.0 (PKCE) and an approved-user allowlist.
- MWC Purview eDiscovery — the full eDiscovery workflow from case to tamper-evident export, on least-privilege app-only permissions with audit logging to Application Insights.
- BexioMCP — natural-language access to Bexio accounting data across 40 read and write tools, with Azure Key Vault secret management and GitHub Actions CI/CD.

Investment Proposal Automation — Portfolio Proposals from CRM Holdings Data
Zoho CRM, Zoho Writer, Zoho Deluge, Multi-currency handling | 2026

- Mapped portfolio holdings and factsheet data across related Zoho CRM modules into the proposal template, so proposals assemble from records already on file instead of manual re-entry.
- Validated the cash, investments, property, and pension calculations against the existing Excel references, and fixed multi-currency totals to convert back to each holding's own currency rather than the account's.

Information Technology Intern (On-the-Job Training)
Manentia Enterprise Support PH Inc. | February 2026 – May 2026

- Produced and revised Zoho Writer templates driving Financial Planning Report (FPR) and investment proposal generation.
- Wrote Deluge functions that mapped CRM records into finished report and proposal documents.
- Extended proposal automation across six investment providers, each with its own template and business logic.
- Diagnosed Zoho Writer rendering faults — chart configuration limits, page breaks, and blank pages — through iterative testing.
- Assisted API integration testing, checking authentication, request construction, and returned data.

PERSONAL PROJECTS

TechSelect — Job Board for Software, Web and Automation Work
Next.js 16, TypeScript, Supabase, pgvector, Drizzle ORM, Vitest | 2026

- Built semantic matching in both directions on pgvector, so a brief finds developers and a developer finds briefs on the evidence of work shipped rather than on keywords, scored against a hand-labelled evaluation set.
- Modelled the domain as 20 Postgres tables behind 42 row-level security policies, and moved ranking out of the request path after measuring a re-rank at 238 seconds against a 300-second serverless ceiling, precomputing it hourly instead.

BarberHouse — Barbershop Booking Website
Next.js, TypeScript, React, Tailwind CSS, REST API, Vercel | 2026

- Built a three-step booking flow with live availability per barber in 15-minute slots, priced per barber, with service duration and buffers taken off the open times.
- Held chairs on a 20% QR downpayment confirmed automatically, and gave customers an authenticated dashboard to reschedule or cancel, releasing the slot immediately, over a versioned REST API.

VistaVR — Virtual Reality Eye Testing Application
Unity, C# | Undergraduate Capstone

- Created a mobile virtual reality (VR) application for digital vision assessment, used with a VR headset enclosure.
- Built visual acuity, colour blindness, and astigmatism screening, with voice recognition for hands-free operation and printable result records.

EDUCATION

Bachelor of Science in Information Technology
Pampanga State University | 2022 – 2026

Junior and Senior High School
Assumpta Technical High School | 2016 – 2022

CERTIFICATIONS

Palo Alto Networks: Cybersecurity Fundamentals; Network Security Fundamentals; Cloud Security Fundamentals; Security Operations Fundamentals
Cisco Networking Academy: Introduction to Internet of Things (IoT) and Digital Transformation
