

WENCE BENIEREM S. TONGOL

CRM Developer | Integrations & Automation

Minalin, Pampanga | 0930 751 9702 | tongolwey@gmail.com | wencebenieremtongol.vercel.app

PROFESSIONAL SUMMARY

CRM developer and integrations specialist with experience in business-process automation, API integration, and cloud deployment. Works with Zoho CRM automation in Deluge, builds MCP connectors on Microsoft Azure, and integrates enterprise systems over REST with OAuth 2.0. Uses Claude as an AI assistant throughout the development workflow — from drafting and debugging code to writing documentation and troubleshooting integrations.

TECHNICAL SKILLS

Languages: JavaScript, Node.js, Python, PHP, C#, Zoho Deluge, HTML, CSS, SQL

Frontend: ReactJS, Tailwind CSS

Cloud and Identity: Microsoft Azure, OAuth 2.0, JSON Web Tokens (JWT)

Platforms and APIs: Zoho CRM, Zoho Writer, Zoho Flow, Microsoft Purview eDiscovery, Model Context Protocol

Databases: MySQL, MongoDB

Testing and Tooling: Postman, PowerShell, EcoHub, Git, GitHub Actions, Node.js test runner

Practices: REST integration, automated testing, CI/CD, audit logging, technical writing, incident troubleshooting

Strengths: Analytical problem solving, ownership, collaboration, clear written communication

AI Tooling: Claude (Anthropic) — used for development workflow, code assistance, documentation, and integration debugging

PROFESSIONAL EXPERIENCE

CRM Developer Associate

Manentia Enterprise Support PH Inc. | June 2026 – Present

- Automate Zoho CRM processes using Deluge scripting and Zoho Writer templates that generate client reports and investment proposals.
- Deliver custom MCP connectors on Azure App Service, exposing enterprise systems to AI assistants under per-user identity and audit control.
- Integrate Microsoft Graph email search and Microsoft Purview eDiscovery through app-only OAuth 2.0, applying least-privilege scopes and audit logging.
- Engineer a FIX 4.4 order-routing service in Python against a private bank's Rules of Engagement, covering mutual-TLS transport, session recovery, engine evaluation (QuickFIX/J against quickfix), and an end-to-end simulator test suite.
- Verify REST integrations with Postman, PowerShell, and EcoHub, exercising token handling, payload structure, and failure paths.
- Resolve assigned IT helpdesk tickets alongside development work.

Projects

JB FIX System — Private-Bank Order-Routing Connector (FIX 4.4)

Python, FIX 4.4 (QuickFIX/J & quickfix), Mutual TLS, SQLite, pytest | 2026

- Engineered a runnable FIX 4.4 order-routing service connecting an external asset manager to a private bank via the Broadridge/NYFIX hub, conforming to the bank's FIX Rules of Engagement with pre-trade validation and a persist-before-send order pipeline.
- Implemented resilience and security — auto-reconnect with Order Status reconciliation, sequence gap-fill recovery, idempotent order handling, mutual-TLS transport, and a tamper-evident SHA-256 hash-chained audit trail.
- Evaluated production FIX engines (QuickFIX/J vs quickfix), added outbound rate-limiting and a Prometheus metrics/alerting endpoint, and proved the system end-to-end against a bank/NYFIX simulator with a 58-test automated suite.

Enterprise MCP Connectors — Identity-Aware Integrations on Azure

Node.js, Microsoft Azure, Microsoft Graph, Microsoft Entra ID, OAuth 2.0, Azure Key Vault, GitHub Actions | 2026

- MWC Mail Search — read-only email search across 240+ Exchange Online mailboxes via Microsoft Graph, secured with Microsoft Entra ID OAuth 2.0 (PKCE), an approved-user allowlist, and Exchange Online Application Access Policy scoping.
- MWC Purview eDiscovery — full Purview eDiscovery workflow (case, KQL search, review set, tamper-evident export) across the tenant, with least-privilege app-only permissions, audit logging to Application Insights, and resilient retry/backoff on throttling.
- BexioMCP — natural-language access to Bexio accounting data across 40 read and write tools, with Microsoft Entra ID OAuth 2.0 (PKCE), Azure Key Vault secret management, and GitHub Actions CI/CD for a zero-long-lived-secret deployment pipeline.

Information Technology Intern (On-the-Job Training)

Manentia Enterprise Support PH Inc. | February 2026 – May 2026

- Produced and revised Zoho Writer templates driving Financial Planning Report (FPR) and investment proposal generation.
- Wrote Deluge functions that mapped CRM records into finished report and proposal documents.
- Extended proposal automation across six investment providers, each with its own template and business logic.
- Diagnosed Zoho Writer rendering faults — chart configuration limits, page breaks, and blank pages — through iterative testing.
- Assisted API integration testing, checking authentication, request construction, and returned data.

PERSONAL PROJECTS

VistaVR — Virtual Reality Eye Testing Application

Unity, C# | Undergraduate Capstone

- Created a mobile virtual reality (VR) application for digital vision assessment, used with a VR headset enclosure.
- Built visual acuity, colour blindness, and astigmatism screening, with voice recognition for hands-free operation and printable result records.

Personal Portfolio Website

ReactJS, Tailwind CSS | wencebenieremtongol.vercel.app

- Designed and published a responsive dark-theme site presenting technical skills, project work, and professional background.

EDUCATION

Bachelor of Science in Information Technology

Pampanga State University | 2022 – 2026

Junior and Senior High School

Assumpta Technical High School | 2016 – 2022

CERTIFICATIONS

Palo Alto Networks: Cybersecurity Fundamentals; Network Security Fundamentals; Cloud Security Fundamentals; Security Operations Fundamentals

Cisco Networking Academy: Introduction to Internet of Things (IoT) and Digital Transformation
